

# Your Home Could Burn Down Tomorrow

What Are You Doing TODAY to Protect it?

Protect Your Home, Art, Valuables and Heirlooms

Cover it with safe and effective fire protection from Sun FireDefense

Call Now (858) 848-0374

## What Are The Advantages?

- Exterior Application lasts for 5-7 years.
- Will not alter the structural integrity of wood.
- User friendly, dries clear, and can be easily applied by spraying, immersing, brushing, or rolling.
- Contains mold/mildew inhibitors – effective against black mold

## Sun FireDefense – a leading provider of Fire Prevention and Protection Solutions

OUR FOCUS IS TO DELIVER ADVANCED FIRE PROTECTION TECHNOLOGY using "Space Shuttle technology transfer" that affords the benefits of high-temperature fire-protection and thermal-insulation developments from aerospace-grade Ceramic Fiber materials used by NASA.

## Fire Resistant & Fire Retardant Clear Spray Coating protects your HOME & ASSETS.

SPF3000 is a post-treatment, interior/exterior fire retardant through a silicone ceramic coating that provides insulation and reflects heat up to 3000° F. It is easily applied and provides fire protection to exterior and interior woods such as: porous woods, cedar shake shingles, open-air roof systems, decking, and structural lumber.

**What our clients are saying about us:**

"Jim's Sunfire defense crew really did an outstanding job in applying what I would consider the best fire protection product we've looked at. Our estate, stables & arena were critical to protect. We even had Jim custom make blankets for our horses as they sustained injuries from burning embers landing on them during our last evacuation. I would highly recommend Sun Fire Defense if protecting your high value assets is high on the priority list."

- Lou Rawls Jr.
